

PCA plot of 1000 Genomes Project data. The x-axis represents PC1 (14.7%) and the y-axis represents PC2 (13.9%). The plot shows the genetic variation across different populations, color-coded as follows:

- European (blue)
- African (red)
- East Asian (green)
- South Asian (orange)
- Admixed American (purple)

The plot displays distinct clusters for each population group, with some overlap between East Asian and South Asian groups. A legend on the right lists the populations and their corresponding colors.
