

PCA plot of 1000 Genomes Project populations. The x-axis represents PC1 (22.4%) and the y-axis represents PC2 (22.4%). The plot shows genetic variation across different populations, color-coded by continental ancestry: African (red), European (green), East Asian (blue), South Asian (orange), and Admixed American (purple). The plot displays distinct clusters for each group, with some overlap between European and East Asian populations. Individual data points are labeled with population and individual IDs, and some are connected by lines indicating relationships.
