

PC3 vs PC4

Clade

- Network graph illustrating interactions between NC_0732xx genes. Nodes are color-coded and labeled with their respective gene IDs. Key labeled nodes include:

 - AAG**: Located near the center of a dense cluster.
 - GAG**: Located below AAG, connected to the cluster.
 - GTA**: Located to the right of AAG, connected to the cluster.
 - GTT**: Located above GTA, connected to the cluster.

Other labeled nodes include:

 - NC_073224.2, NC_073239.2
 - NC_073227.2, NC_073240.2
 - NC_073228.2, NC_073241.2
 - NC_073229.2, NC_073242.2
 - NC_073230.2, NC_073243.2
 - NC_073231.2, NC_073244.2
 - NC_073232.2, NC_073245.2
 - NC_073233.2, NC_073246.2
 - NC_073234.2, NC_073247.2
 - NC_073235.2, NC_073248.2
 - NC_073236.2, NC_086017.1
 - NC_073237.2, NC_086018.1
 - NC_073238.2

Unlabeled nodes are represented by small black dots throughout the graph.
